DROP DEAD PEST CONTROL

Your Local Pest Control Experts

- **Excellent Service**
- **Excellent Results**

We offer the following services to ensure that your home and business environment is safe, hygienic and pest free.

General Pest Control

Our General Pest Service treats all webbing spiders, cockroaches, silverfish and wasps. We treat the internal and external areas of your home including the roof void, subfloor, garage, sheds and fences.

Flea Treatment

We love our pets but unfortunately fleas do too. Flea infestations not only affect your pet but also your family when they take hold in the house and yard. Our flea treatment is thorough and effective and will rid your home of these annoying pests.

Termite Inspections

Your home and property should be inspected annually for any sign of termites. We will inspect your home thoroughly using our specialized termite inspection equipment and will provide you with an eight page report and advice on what you can do to protect your home from termite attack.

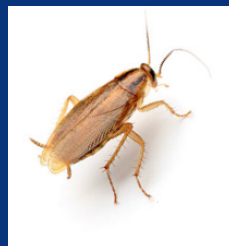

Ant Treatment

Are ants appearing inside your home? Nesting ants love wall cavities, roof voids and pantries! When you spot them inside, it's often an indication that there could be an underlying ant problem that needs to be addressed. If left untreated, these pests can cause damage to electrical wiring and appliances.

Termite Treatment

If you find active termites in your home or on your property, don't disturb them. Call our office and we will have one of our Timber Pest Inspectors come ASAP. We will assess the situation and recommend the most appropriate treatment to eradicate them from your home.

German Cockroach Treatment

German cockroaches can innocently be brought into your home in boxes, shopping bags or even second hand appliances. With around 30 babies hatching from just one egg, a severe infestation can result quite quickly if left untreated. If you see them, give us a call and book in for a treatment immediately.

Possum Removal & Proofing

Possums are cute but not when they're living inside your roof and keeping you awake at night! Their urine will stain your ceiling and you could end up with their whole family living up there. We will capture the possum and release it away from your home so then you can get some sleep!

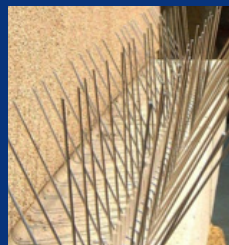

Rats & Mice

Rodents carry disease and their scratching and gnawing in the ceiling and walls can keep you awake at night. We will inspect your home, identify the problem areas and secure bait in safe locations. Our rodent treatment will send them packing!

Pre-Construction Termite Protection

Are you building a new home or adding an extension? Talk to us about termite protection. We are accredited installers of the HomeGuard Range of products.

Bird Problems & Proofing

Are birds causing a problem at your home? Birds carry lice and their droppings spread disease. We can remove nests, live birds and eggs and proof problem areas so birds don't return. We can provide advice on the best options of keeping them away from your home and causing problems.

Pre-Purchase Timber Pest Inspections

Make sure the home you're buying has no hidden, costly surprises! We carry out a thorough inspection of the property and use our Thermal Imaging and Termatrac equipment, should further investigation be required. Our comprehensive report includes photographs and a personal consultation with our Inspector to discuss the property you are buying.

Termite Protection for Existing Homes

Depending on the way your home has been constructed, we can install either a treated perimeter zone around your home or a termite monitoring and baiting system to protect it from future termite attack.
